# G690 TREADMILL

Verde is the industry's first treadmill that is capable of harnessing human power and converting it to utility grade electricity. The sleek, non-motorized design combines supremely low friction and flat-slat belt to create an approachable unit that feels remarkably natural and comfortable. Utilizing both mechanical and electrical braking systems the Verde allows walking, jogging, running, sprinting or sled pushing features that cater to a broad spectrum of users, from deconditioned to elite athletes and is capable of capturing up to 200 Watts/hour of energy.
