ABOUT THE INSTALL

////////////////////

Aqualina at Bayside Toronto is the first residential phase of Bayside Toronto, a 13-acre mixed-use development on Toronto's waterfront. Designed by world-renowned architects, Arquitectonica, the 13-story Aqualina at Bayside Toronto is currently under construction with completion scheduled for late 2017.

Aqualina at Bayside Toronto contains 362 condominium suites, ranging from one-bedroom to three-bedroom residences designed with families in mind. Suite sizes will range from 560 square feet to just over 2,100 square feet. It is defined by a series of distinctive prismatic cubes made of glass and steel, featuring facades accented by angled fenestration and balcony designs intended to maximize views of the Toronto cityscape and Lake Ontario.

Aqualina at Bayside Toronto will pursue a LEED® Platinum designation and will be part of Toronto's first LEED-ND Gold neighborhood.

WHY SPORTSART?

////////////////////

Aqualina's parent company, Tridel, is familiar with SportsArt products and have bought from us in the past. They immediately thought of SportsArt while searching for the most advanced system available for their key properties, knowing that our equipment would ensure the best possible experience for facility owners. In addition to that, Regional Sales Manager John Price visited Toronto and truly impressed senior management, which helped secure the last few and upcoming orders.
