

# E875 (MA + MU + MP) COMPLETE ICARE SYSTEM

SportsArt partnered with, the prestigious, Madonna Rehabilitation Hospital and Research Institute to create the ICARE rehabilitation system. ICARE'S intelligently-controlled, motor-assisted leg movements closely mimic the kinematic and Electromyographic (EMG) patterns of walking. The full ICARE system provides zero, partial, or full-body weight support and motor guidance which frees clinicians from hours of strenuous manual manipulation, allowing them to provide detailed feedback to the patient.
