

# T655MD TREADMILL

The T655MD Series treadmill is a new addition to our medical treadmill line. The T655MD offers a greater incline range and long medical handrails that can rise, lower and angle inward. Additionally, a detachable step has been added, lowering the step-up height. The T655MD comes standard with a wired controller, allowing the physician or rehabilitation technician to easily control both speed and incline of the unit.
